Summary

An engineer building a career in AI and Robotics, with experience in autonomous systems, embedded hardware, and organizing large-scale tech events for the community.

Work Experience

PAN-IIT India | Intern
Karo Startup | Engineering Intern

Mar 2026 - May 2026
Sep 2025 - Dec 2025

Projects

- CASTA (Counter-Drone Detection Platform):** An AI-driven C-UAS for real-time drone and trajectory tracking.
- FarmBot:** A Webots simulation of an agricultural omni-directional robot with a 6-DOF arm.
- Hapticus:** A pipeline translating digital text and PDFs into tactile Braille output.
- Drone-Powered High-Speed Race Cars:** Repurposed drone propulsion to build high-speed RC cars with optimized motor configurations.
- Autonomous Robotics & Edge AI Devices:** An autonomous device including a voice-controlled obstacle-avoiding car and a SLAM-based Micromouse.
- Smart Medical Weighing Scale:** A custom IoT healthcare device with load cells and HX711 amplifier transmitting patient data.
- PostMortemAI:** AI-powered audit report generation platform producing technical reports from multiple POVs.
- Klytik:** Lead generation tool combining a Rust Chrome extension to let freelancers pitch gigs in four clicks.
- CGS (Circuit Graphic Symphony):** Multimodal framework converting text into schematics and SPICE netlists.
- Fabguard-AI:** Computer vision application detecting fabrication defects on SEM wafers in real time.
- Tenderlytics:** An AI-driven bid qualification platform automating parsing of complex legal tender documents.
- Fundify:** A DeFi crowdfunding platform with DAO governance enabling decentralized funding and voting.
- LendBuddy:** A multilingual LangChain loan advisor deployed via WhatsApp handling loan eligibility checks autonomously.
- PetPal:** AI-powered Flutter Android app for real-time dog health consultations with voice/video AI vet integration using Gemini API and Firebase.
- SafeScan:** Mobile health app empowering consumers to instantly identify harmful ingredients and allergens in everyday products, enabling informed purchasing decisions for safer living.

Education

RV INSTITUTE OF TECHNOLOGY AND MANAGEMENT, India
B.E. in Electronics & Communication

Sep 2023 - Present

Skills

- Embedded Systems & Hardware:** Embedded C/C++, Microcontrollers (ESP32, ESP8266, Raspberry Pi), RTOS, PCB Design, Sensor Fusion, IIoT, Wokwi, Proteus
- Robotics & Autonomy:** ROS / ROS2, SLAM, Control Systems, Robot Simulation (Webots, Gazebo), CAD / 3D Modeling, Point Cloud Library (PCL)
- AI, ML & Computer Vision:** PyTorch, TensorFlow, OpenCV, YOLO, Edge AI, ONNX / TensorRT, LangChain, LangGraph, RAG Architectures
- Programming Languages:** C/C++, Python, Rust, JavaScript / TypeScript, Dart, MATLAB / Simulink, Verilog, SQL / NoSQL
- Frameworks & Web/Mobile:** FastAPI, Next.js, Node.js, Flutter, React Native
- Developer Tools & Infrastructure:** Linux, Git, Docker, Kubernetes, AWS, GCP

Extracurricular & Leadership

- IIT Bombay, E-Cell** – Campus Ambassador
- IEEE RAS Society, RVITM** – President
- Phoenix Robotics Club, RVITM** – Vice President
- Startup Ignition Cell, RVITM** – President
- Microsoft Student Learn, RVITM** – Team Head
- Google Developer Group, RVITM** – Team Head
- Robofiesta, RVITM** – Technical Head
- Apna Meetup** – Coordinator
- Hacktoberfest** – Community Volunteer
- National Social Service** – Community Volunteer
